**RE: Revision 3 Submittal – Supplemental Mine Waste Rock Dump and Facility
Soil and Vegetation Characterization Sampling and Analysis Plan - Final**

Dear Mike,

Please find enclosed the final version of the Supplemental Mine Waste Rock Dump and Facility Soil and Vegetation Characterization Sampling and Analysis Plan. This final version is being provided based on Agencies and Tribes (A/T) approval of Revision 3 as indicated in your 13 July 2009 letter to P4 Production.

As opposed to producing a complete copy, we have provided replacement spine, cover sheets, and title pages that indicate a final version. In addition, we have provided a CD with a complete "final" version. The complete final copy has also been posted on the ftp site. You may wish to also remove the response to comments for Revision 2 from the front of the Revision 3 document. A copy of this response to comments document is already contained in Revision 3 in Attachment 4 (Document Comments and Responses). To complete Attachment 4, you should also add the 13 July 2009 approval letter. A copy of this letter is provided.

We appreciate the A/T's input during the development of this important document. If you have any further questions about this submittal, please do not hesitate to contact Barry Koch or me.

Best Regards,

A handwritten signature in black ink, appearing to read "Cary Foulk".

Cary L. Foulk
Supervising Geologist/Geochemist

Enclosure – Replacement spine, title pages, covers and CD for *Supplemental Mine Waste Rock Dump and Facility Soil and Vegetation Characterization Sampling and Analysis Plan Final Revision 3*
